CAPTURES A TRAIN WRECKER

After Making Three Attempts
Waukegan Section Hand
Lands in Jail

FRIENDS TRIED TO RESCUE

Seventeen Year Old Italian Caught Red
Handed by Detectives While Placing
Obstruction on Track

Patsy Valletto, 17 years old, an Italian section hand in the employ of the Chicago and Northwestern railroad, at Waukegan, was captured at the point of a gun Saturday night by detectives in the employ of the road after he had made a third alleged attempt to wreck a train by placing obstructions on the track. The three attempts were made within a period of five days. Three friends of Valletto's sought to take him from the two detectives but were deterred by the guns in the hands of the two officers.

The first attempts to wreck the flyer was made Tuesday night. At that time two heavy ties were placed upon the track being firmly wedged in place by a large boulder.

Detective William Jeffery and an assistant were sent to Waukegan to aid the local police in making an investigation. They worked on the case all the week but were able to secure no clew until Friday night when a second attempt was made to wreck the same train.

The second time a heavy steel fish plate used in bolting rails together was placed upon the track in such a way that it seemed certain it would derail the train but as good luck would have it the flange of one of the engine wheels struck the obstruction in such a way that it was hurled to one side.

The detectives made up their minds that inasmuch as two attempts had been made that it was very likely that the train wreckers would make another try in the near future. They determined to keep watch from that time on in the hope that they might catch them red handed.

Their chance came sooner than they expected. They laid in wait Saturday night, hiding behind some freight cars that had been left on a side track. The two attempts had been made at one point so it was probable the third attempt would be made in the same place. This proved to be the case.

After a rather tiresome wait their sight was rewarded by the sight of a man stealing out of the shadow at the other side of the track carrying some heavy object in his arms. They waited only to see him deposit it upon the rails. Then slipping out quickly they caught him and before he knew what had happened they had placed the come-alongs upon his wrist.

The moment he felt himself in the hands of the two officers the prisoner cried out for help. Three men appeared and made an advance upon the officers. Divining their intention of freeing the prisoner and thinking it quite likely they would have to contend with knives the two officers drew their guns and faced the trio. The moon shone quite brightly and revealed to the three men that they were facing a rather serious proposition and they decided to give up their proposed attack.

The train-wrecker was taken to the police station after he had offered more or less resistance. He professed to speak no English and would make no statement.

LIGHTNING STRIKES BARN AT GRAYSLAKE

Orrin Macble's barn back of the Grayslake blacksmith shop in that village burned to the ground Tuesday morning, being struck by lightning between one and two o'clock. The fire whistle sounded the alarm and the fire department of the village responded.

The barn was adjacent to other buildings and for a time it looked as though the flames were likely to communicate to the others and a disastrous fire result. But by some rather lively work the fire was confined to the one building and it was soon burned out.

The One Idea.
Frequently the man of one idea would get along better if he didn't adopt a new one every day.

AN OLD SOLDIER GONE

Michael H. Sheehan Passes Away at His
Home of Bright's Disease

Another one of Lake county's old soldiers answered to the last roll call when Michael H. Sheehan passed away at 9 o'clock this (Thursday) morning. His death is the culmination of a long and painful illness of Bright's disease, which had lasted over a period of two years.

Mr. Sheehan was one of the best known residents of the community and has always commanded the highest respect of his neighbors and associates.

Mr. Sheehan was born in Ireland in the year of 1844, and passed away at his home in Loon Lake, Aug. 25, 1910, at the age of 66 years and 20 days. He was united in marriage to Miss Sarah Ford, Aug. 5, 1866, and was left a widower in 1881. To this union four children were born three of whom survive him.

In the year 1883 he was again married to Miss Alice Carroll, who with his two sons, Herbert and William of Loon Lake and one daughter, Mrs. W. J. Waters of Chicago are left to mourn the loss of one dear to them.

Mr. Sheehan was one of the many who fought for the cause of his country and was a member of the sixty-fifth Illinois Infantry.

The deceased has resided at Loon Lake since the year 1848 and his death will be most sincerely regretted by his many friends in the community.

The funeral services will be held Saturday at ten o'clock at St. Peter's church, burial at Mill Creek cemetery.

LAKE CO. HAS FIRE VICTIM

Roderick Ames of Rosecrans Reported
Dead in Idaho Forest Fires

Special dispatches from Spokane are to the effect that Roderick Ames, the son of Roderick Ames of Rosecrans, is a forest fire victim at Big Creek in the Coeur d'Alene district.

The following special dispatch was received here late Wednesday afternoon from Spokane, Wash.: Relief trains have reached the scene of the disaster on Big Creek of the St. Joe in the Coeur d'Alene district in Idaho. At this point eleven dead have been buried, the names of those identified being Roderick Ames, Joe Beauchamp, W. J. Elliott, D. Brown, Felix Pholmi, William Cameron, V. Atton, Upton B. Smith and A. Hukale.

The late Roderick Ames is the son of Roderick Ames of Rosecrans, pioneer and one of the very early Browe school teachers.

He went west some years ago with his brothers John, Clarence and Philo and all of them were located at or near Coeur d'Alene as is a uncle Elijah Ames.

Clarence Ames is the owner of a valuable timber claim, Roderick owned a timber claim and a farm in recently opened up land. John owned a large area of farm and timber land.

DEATH CLAIMS YOUNGEST CHILD OF ELMER STICKLES

Wednesday morning at half past three o'clock death came to relieve the sufferings of little Floyd, the youngest child of Mr. and Mrs. Elmer Stickles.

The little one was seven months of age the seventh day of the present month and had never been a strong or healthy child.

In an endeavor to do all that was possible for the little one the parents placed it in a hospital in Chicago some four months ago, where it remained for five or six weeks. For a time it appeared to be on the gain and the parents were much encouraged but for only a short time.

A few weeks ago a complication of troubles set in and the little one has lain in a critical condition with its death daily expected for some time.

The funeral services will be held at the home this (Thursday) afternoon at two o'clock, with Rev. F. R. McNamer officiating. The interment will be in the Hillside cemetery.

The parents have the sympathy of the community in their sorrow.

Judicial Wisdom.

Phillip of Macedon, in passing sentence on two rogues, ordered one of them to leave Macedon with all speed and the other to try and catch him.—Plutarch.

About the Size of It.

"Half the world doesn't know how the other half lives," said the professor, trying to be sociable. "Yea," put in the grouch, "and what's more, it's too busy to care."

Satire.

When a hero is to be pulled down and degraded, it is best done in dog-gorel.—Addison.

FIRE A SHOT AT CROWD

Young Man at Charivari is
Shot in the Neck by an
Angry Wadsworth Man

MAY TERMINATE FATALY

William Gallagher is Shot When He and
Others go to Charivari Couple Who
Have Been Married Six Months

Because acquaintances persisted in congratulating him upon his marriage whenever they met him and even went to his home one mile west of Wadsworth last Saturday evening near ten o'clock to charivari him despite the fact that his marriage took place six months ago, Matt Meyers became enraged and fired a shot at the crowd, the bullet taking effect in the neck of William Gallagher.

Gallagher was removed to his home and Dr. Jamieson of Millburn was hastily summoned. He examined the patient and declared that the bullet narrowly escaped severing the jugular vein which would have resulted in almost instant death for the victim. He made no attempt to probe for the bullet, fearing that the shock would be too much for Gallagher.

In a statement made Monday morning Dr. Jamieson declared that it was impossible to say just how serious the man's injuries really are. He admitted they may prove fatal but hopes to prevent possible infection. Gallagher is staying at the home of his parents in Wadsworth.

Meyers was married last spring and at the time a large number of young men living in the neighborhood went to his home to charivari him. Meyers did not seem to take kindly to the idea and going to Waukegan the next day presented a list of the men who had participated in the affair and asked that warrants for their arrest be sworn out. State's Attorney Dady persuaded him the wiser course would be to let the matter drop. He was loath to do so but finally consented.

Ever since then it is claimed that neighbors have worried him considerably. Whenever they met him on the street it is said they would make some remark.

Last Saturday night several young men decided they would go to his home and give him another charivari. Just how the shooting took place cannot be learned, as there are conflicting stories floating about the village. The one that seems to be accepted is that Meyers ran into the road where it is alleged he drew his revolver and fired the shot.

The strange part of the affair is that no action as yet has been taken to place anybody under arrest and inquiry at Wadsworth fails to show that such action is contemplated.

JOHN A. HARTNELL DIED AT SALEM MONDAY NIGHT

Monday night near the hour of midnight at his home at Salem, Wis., occurred the death of one of that town's best known citizens, John A. Hartnell.

The deceased had been slightly ailing for some little time but was not considered really sick until a little over a week ago when he became seriously ill and his malady was diagnosed as bright's disease.

Mr. Hartnell was at one time associated with the firm of Gregory & Hartnell in the liquor business but disposed of his interests in the firm some time ago. About a year ago he purchased the hardware business of H. B. Gardner and has conducted it every since.

Mr. Hartnell has many friends in the vicinity of Salem who sincerely regret his demise for by his death they have lost a good comrad and faithful friend and the town is bereft of one of its most enterprising business men and a staunch and upright citizen.

The funeral services were held from the home Wednesday afternoon at two o'clock.

Card of Thanks

We desire to express our heartfelt thanks to our friends and neighbors for the kindness and sympathy shown during the illness and death of Mrs. Blandana Yopp; also those who contributed flowers. THE FAMILY.

SCHEDULE IS RAISED \$130,000

Inspection of Board of Review
Results in \$130,000 Raise
in Icemen's Schedule

NONE ESCAPED THE RAISE

Calvin Durand of Lake Forest, Appears
Before Board and Raises His
Schedules \$60,000

As a result of the members of the Board of Review having paid a visit to the various Lake county ice houses and conducted a personal investigation the tax schedule on these houses and their contents has been raised \$130,000 this year. The raise is general, none of the houses having escaped.

The board members made measurements in each case and estimated the amount of ice contained in each house. This was assessed at a flat rate of 50 cents per ton. The argument of the ice company representatives that the ice was of no value until put into use was disregarded.

The figures were changed as follows:
Town of Grant:—Morris & Co, from \$9,900 to \$25,000.

Knickerbocker Ice Co., Fox Lake house, \$6,900 to \$22,500.

Knickerbocker Ice Co., Pistake Lake house, from \$3,300 to \$10,000.

Knickerbocker Ice Co., Long Lake house, from \$6,900 to \$17,500.

F. J. Ruh, Ingleside house, from \$2,500 to \$4,000.

Town of Antioch:—Knickerbocker Ice Co., Lake Catherine house, from \$2,000 to \$8,000.

Knickerbocker Ice Co., Loon Lake house, from \$10,930 to \$18,770.

Knickerbocker Ice Co., Loon Lake house, from \$5,949 to \$11,818.

Knickerbocker Ice Co., Lake Villa house, from \$17,139 to \$35,000.

Oetting Bros., Channel Lake house, from \$12,798 to \$25,000.

California Ice Co., Lake Marie house, from \$6,600 to \$15,000.

Town of Avon:—Armour & Co., Round Lake house, from \$19,500 to \$32,500.

Knickerbocker Ice Co., Taylor Lake house, from \$4,050 to \$11,000.

Town of Elia:—Knickerbocker Ice Co., Lake Zurich house, from \$8,058 to \$20,000.

Calvin Durand of Lake Forest, appeared before the board Tuesday morning and raised his schedule value from \$20,000 to \$80,000. It is explained that he had a certain amount of money which he did not at first consider assessable but later learned differently and changed his schedule value.

He said that the present Armour assessment is \$337,500 and that Armour is willing to stand for \$250,000 value on the residence near Lake Forest, while \$1,000 would cover the plate and \$15,000 furniture in the house. He urged that the presence of Armour, his public spirit and benefactions, his improvements, and his spending money for Lake county labor were all benefits to be considered.

He denied that the Armour residence cost millions and asserted for comparison sake that the Railway Exchange in Chicago cost but a million and the Corn Exchange building with sixteen stories of steel construction but a million and a half.

He asserted that labor on the residence cost \$75,000 and plumbing alone on contract \$20,000.

The board urged that it would like to have Armour himself appear. Armour is cited to appear personally any time within a week.

THE MILK PRODUCERS ASK AN INCREASE

Directors of the Milk Producers' Protective Association, representing 4,000 dairy farmers in Illinois, Wisconsin and Indiana, who provide about 70 per cent of the milk used in Chicago, met at their headquarters in the Ashland block Wednesday and decided to demand an average of 4 1/2 cents a quart from the bottling companies for their milk during the six months of the winter period, beginning Oct. 1.

The demand, which will be presented to the superintendents of the bottling plants of the Borden, Mix, Bowman and other companies, will be in the form of an average of \$1.98 per 100 pounds. The dairymen figure forty-eight quarts to 100 pounds. The figures by months, are as follows: October, \$1.90, November, \$2; December, \$2.05; January, \$2.05; February, \$2, and March, \$1.90.

"The average of \$1.98 per 100 pounds means 4 1/2 cents a quart and we want the public to know the price per quart so they will know just how much we are getting, as they do not understand the figures on the basis of 100 pounds," said James J. Grier, secretary of the association. "We want the public to know just how much the farmers get so they will not think we are responsible for the price of 8 cents a quart. In the summer months the price the farmers will receive will be about 3 cents a quart, but the retail price will be unchanged."

Card of Thanks

We wish to sincerely thank our friends and neighbors for their kindness and sympathy manifest during our recent bereavement.

Mr. and Mrs. Chas Cobb and family,

AGED RESIDENT IS DEAD

Mrs. Barnard Yopp Passed Away Monday
After a Long Illness.

Monday afternoon another one of our oldest settlers was taken from our midst by death when Mrs. Barnard Yopp quietly breathed her last at the home of her daughter, Mrs. Chas. Herman, of Grass Lake.

Mrs. Yopp had been very ill for many weeks and although her death was not unexpected it came as a shock to the children who are called upon to mourn the loss of a most devoted mother. For the past four or five years she had been in failing health due to declining years and also being afflicted to a considerable extent with palsy, and for the past several months has been almost entirely helpless. She was a great sufferer but through it all she displayed an admirable amount of patience and forbearance and at all times seemed perfectly contented with her lot.

Miss Blandana Swartz was born in Wurtemberg, Germany, the second day of November, 1836, and passed away on the twenty-second day of August, 1910 in the seventy-fourth year of her life. At the age of twenty-six years she came to America and three years later on the seventeenth day of April, 1865, she was united in marriage to Barnard Yopp. In the year of 1866 they came to Lake County and settled at Grass Lake which place she called home ever since, having lived there continuously ever since with the exception of about four years which she spent at the home of her daughter, Mrs. E. J. Lewis at this place.

Fifteen years ago she was called upon to mourn the loss of her husband who departed this life, July 4, 1895, and she had also laid to rest three of the ten children who were born to them.

She is survived by seven children, two sons, George, of this place and Robert of Bloomer, Wis., and five daughters, Mrs. Chas. Cobb and Mrs. Chas. Herman of Grass Lake, Mrs. T. R. Wilton, of Loon Lake, Mrs. Thos. Brogan, of Chicago and Mrs. E. J. Lewis of Antioch, besides several grandchildren and many other relatives and friends.

The funeral services were held at the home of her grandson, Eugene Herman, Wednesday afternoon at two o'clock with Rev. F. R. McNamer officiating and the grandsons of the deceased acting as pall bearers.

The floral tokens were of the most beautiful and by their profusion showed the esteem in which the departed was held by the entire community.

ARMOUR CITED TO APPEAR

Claims His Lake Forest Home is Only a
Summer Bungalow

A. E. Stager appeared before the board of review Tuesday afternoon for J. Ogden Armour and his Lake county property and pleaded that Armour is not a resident of Lake county, but a mere summer resorter, while the costly residence is merely a summer bungalow worth a trifle like \$350,000.

He said that the present Armour assessment is \$337,500 and that Armour is willing to stand for \$250,000 value on the residence near Lake Forest, while \$1,000 would cover the plate and \$15,000 furniture in the house. He urged that the presence of Armour, his public spirit and benefactions, his improvements, and his spending money for Lake county labor were all benefits to be considered.

He denied that the Armour residence cost millions and asserted for comparison sake that the Railway Exchange in Chicago cost but a million and the Corn Exchange building with sixteen stories of steel construction but a million and a half.

He asserted that labor on the residence cost \$75,000 and plumbing alone on contract \$20,000.

The board urged that it would like to have Armour himself appear. Armour is cited to appear personally any time within a week.

Must Be a Goal.
There can be no progress when there is no end in view.

The Best Hour of Life

is when you do some great deed or discover some wonderful fact. This hour came to J. R. Pitt, of Rocky Mt., N. C. when he was suffering intensely, as he says, "from the worst cold I ever had, I then proved to my great satisfaction, what a wonderful cold and cough cure Dr. King's New Discovery is. For, after taking one bottle, I was entirely cured. You can't say anything too good of a medicine like that." It is the surest and best remedy for diseased lungs, hemorrhages, lagrippe, asthma, hay fever, any throat or lung trouble. 50c. \$1.00. Trial bottle free. Guaranteed by J. H. Swan.

ENGELHARD OUT FOR FOSS' JOB

Strong Run Promised for Candidate for Congress Who
is Most Capable Man

HAS MEETING IN WAUKEGAN

Wednesday's Waukegan Daily Sun Comments Editorially on the Campaign—Gives Foss Slap

George P. Engelhard, republican candidate for congress from this district, visited Waukegan Friday night to arrange for a meeting there at which his candidacy will be formally launched.

Mr. Engelhard lives at Evanston, is a man of considerable wealth, accumulated in the publishing business in Chicago. He is aggressive, has a fine education and is an orator of ability. His published platform contains the following paragraphs that will sound good to Lake county voters:

"I am opposed to those schedules in the new tariff act manifestly dictated by the avarice of special interests and accepted by their servants of the senate and house in opposition to the demands and despite the protests of the people."

"I admire the heroic courage with which the so-called 'insurgents' in the senate and house faced the bristling phalanx of 'organization' tyranny, and won victory after victory for the people."

"I condemn the despotism of Speaker Cannon as unrepresentative and revolutionary and favor the utter and immediate overthrow of Cannonism as a sacred obligation to the party and the American people."

To those who gathered to confer with Mr. Engelhard he appeared a man of sterling qualities and made an impression that enthused all who met him. In his brief talk with a score of Waukeganites he emphasized his position thus:

"The Hon. George Edmund Foss has represented the Tenth Congressional district in congress for many years and without incurring serious criticism until the last session when he openly espoused the cause of Speaker Cannon and in every instance voted for the perpetuation of Cannonism and all that it implied."

"Will the district indorse the subservience of Mr. Foss to the Cannon regime? Will it run the risk of his crushing defeat at the general election and the succession of a democratic representative from the one-time banner republican district of Illinois?"

"A vote for Foss means a vote for Cannon! If you are against Cannonism, if you believe in a progressive national policy and a victory for the 'insurgent cause,' I shall be grateful for your support and vote."

The following is taken from the editorial columns of Wednesday's Waukegan Daily Sun:

Congressman George Edmund Foss is in town. So is Candidate George P. Engelhard, who hopes to succeed Mr. Foss.

Mr. Engelhard in meeting our people defines his position clearly and enthusiastically. He is an educated, intelligent and energetic man, admires the "insurgents" in congress, don't like Mr. Aldrich's tariff and believes Joe Cannon is to blame for a lot of things which do little credit to the Republican party.

You like him. He is so different. He speaks his mind, determinedly, says what he means and means what he says, which is refreshingly unusual for congressional candidates in this neck of the woods.

George Edmund is around the while with the usual patronizing, meaningless demeanor and greetings. He doesn't do or say anything to his particular credit or discredit, just circulates about and hedges on pertinent questions, while the postmasters trail along in dignified admiration of their jobs.

We don't know whether Engelhard has a chance on earth to beat Foss. Some will bet a whole lot he has, but one thing is sure—this whole fuss is worth while, even if only to animate Foss into some sort of a campaign based on something besides our t-h-r-e-e-h-u-n-d-r-e-d-a-n-d-f-o-r-t-y-f-i-v-e-t-h-o-u-s-a-n-d-d-o-l-l-a-r harbor, made possible and located here through the initiative of the E. J. & E. railroad and the American Steel & Wire Company, the naval station which is a monument so far as its location in this county is concerned to Mr. Graeme Stewart and not Mr. Foss, and the new post-office building, which we have not got.

We may now hope to hear from our congressman on issues of the day, and be enlightened as to his reasons for voting and representing us as he has in the House.

The Courage of Captain Plum

By JAMES OLIVER CURWOOD

Illustrations by Magnus G. Kettner

(Copyright 1908 by Bobbs-Merrill Co.)

SYNOPSIS.

Captain Nathaniel Plum of the sloop *Typhoon*, lands secretly on Beaver Island, Lake Michigan, stronghold of the Mormons. Obadiah Price, an eccentric old man and counselor of the Mormons, who has been spying on him, suddenly confronts him and tells him he is expected. Plum insists he has got the wrong man. Price ignores his protestations and bargains for the ammunition on board the sloop. He binds Nat by a solemn oath to deliver a package to Franklin Pierce, president of the United States. He agrees to show Plum the Mormon town, St. James. Plum sees the frightened face of a young woman in the darkness near Price's cabin. She disappears, leaving an odor of lilacs.

CHAPTER II.—Continued.

For several minutes Captain Plum stood as if the sudden apparition had petrified him. He listened long after the sound of retreating footsteps had died away. There remained behind a faint sweet odor of lilac which stirred his soul and set his blood fighting. It was a beautiful face that he had seen. He was sure of that and yet he could have given no good verbal proof of it. Only the eyes and the odor of lilac remained with him and after a little the lilac drifted away. Then he went back to the log and sat down. He smiled as he thought of the joke that he had unwittingly played on Obadiah. From his knowledge of the Beaver Island Mormons he was satisfied that the old man who displayed gold in such reckless profusion was anything but a bachelor. In all probability this was one of his wives and the cabin behind him, he concluded, was for some reason isolated from the harem. "Evidently that little saltiness is not a flirt," he concluded, "or she would have given me time to speak to her."

The continued absence of Obadiah Price began to fill Captain Plum with impatience. After an hour's wait he reentered the cabin and made his way to the little room, where the candle was still burning dimly. To his astonishment he beheld the old man sitting beside the table. His thin face was propped between his hands and his eyes were closed as if he was asleep. They shot open instantly on Captain Plum's appearance.

"I've been waiting for you, Nat," he cried, straightening himself with spring-like quickness. "Waiting for you a long time, Nat!" He rubbed his hands and chuckled at his own familiarity. "I saw you out there enjoying yourself. What did you think of her, Nat?" He winked with such audacious glee that, despite his own astonishment, Captain Plum burst into a laugh. Obadiah Price held up a warning hand. "Tut, tut, not so loud!" he admonished. His face was a map of wrinkles. His little black eyes shone with silent laughter. There was no doubt but that he was immensely pleased over something. "Tell me, Nat—why did you come to St. James?"

He leaned forward over the table, his odd white head almost resting on it, and twiddled his thumbs with wonderful rapidity. "Eh, Nat?" he urged. "Why did you come?"

"Because it was too hot and uninteresting lying out there in a calm, dad," replied the master of the *Typhoon*. "We've been roasting for 36 hours without a breath to fill our sails. I came over to see what you people are like. Any harm done?"

"Not a bit, not a bit—yet," chuckled the old man. "And what's your business, Nat?"

"Sailing—mostly."

"Ho, ho, ho! of course, I might have known it! Sailing—mostly. Why, certainly you sail! And why do you carry a pistol on one side of you and a knife on the other, Nat?"

"Troublesome times, Dad. Some of the fisherfolk along the Northern End aren't very scrupulous. They took a cargo of canned stuffs from me a year back."

"And what use do you make of the four-pounder that's wrapped up in tarpaulin under your deck, Nat? And what in the world are you going to do with five barrels of gunpowder?"

"How in blazes—" began Captain Plum.

"O, to be sure, to be sure—they're for the fisherfolk," interrupted Obadiah Price. "Blow 'em up, eh, Nat? And you seem to be a young man of education, Nat. How did you happen to make a mistake in your count? Haven't you 12 men aboard your sloop instead of eight, Nat? Aren't there 12 instead of eight? Eh, Nat?"

"The devil take you!" cried Captain Plum, leaping suddenly to his feet, his face flaming red. "Yes, I have got 12 men and I've got a gun in tarpaulin and I've got five barrels of gunpowder! But how in the name of kingdom-come did you find it out?"

Obadiah Price came around the end of the table and stood so close to Captain Plum that a person ten feet away could not have heard him when he spoke.

"I know more than that, Nat," he whispered. "Listen! A little while ago—say two weeks back—you were becalmed off the head of Beaver Island, and one dark night you were boarded by two boat-loads of men who made you and your crew prisoners, robbed you of everything you had—and the next day you went back to Chicago. Eh?"

Nathaniel stood speechless. "And you made up your mind the pirates were Mormons, enlisted some of your friends, armed your ship—and you're back here to make us settle. Isn't it so, Nat?"

The little old man was rubbing his hands eagerly, excitedly.

"You tried to get the revenue cutter Michigan to come down with you, but they wouldn't—ho, ho, they wouldn't! One of our friends in Chicago sent quick word ahead of you to tell me all about it, and—Strang, the king, doesn't know!"

He spoke the last words in intense earnestness.

Then, suddenly, he held out his hand.

"Young man, will you shake hands with me? Will you shake hands?—and then we will go to St. James!"

Captain Plum thrust out a hand and the old man gripped it. The thin fingers tightened like cold clamps of steel. For a moment the face of Obadiah Price underwent a strange change. The hardness and glitter went out of his eyes and in place there came a questioning, almost an appealing, look. His tense mouth relaxed. It was as if he was on the point of surrendering to some emotion which he was struggling to stifle. And Nathaniel, meeting those eyes, felt that somewhere within him had been struck a strange chord of sympathy, something that made this little old man more than a half-mad stranger to him, and involuntarily the grip of his fingers tightened around those of his companion.

"Now we will go to St. James, Captain Plum!"

He attempted to withdraw his hand but Captain Plum held to it.

"Not yet!" he exclaimed. "There are two or three things which your friend didn't tell you, Obadiah Price!"

Nathaniel's eyes glittered dangerously.

"When I left ship this morning I gave explicit orders to Casey, my mate."

He gazed steadily into the old man's unflinching eyes.

"I said something like this: 'Casey, I'm going to see Strang before I come back. If he's willing to settle for five thousand, we'll call it off. And if he isn't—why, we'll stand out there a mile and blow St. James into hell! And if I don't come back by to-morrow at sundown, Casey, you take command and blow it to hell without me! So, Obadiah Price, if there's treachery—'

The old man clutched at his hands with insane fierceness.

"There will be no treachery, Nat. I swear to God there will be no treachery! Come, we will go—"

Still Captain Plum hesitated.

"Who are you? Whom am I to follow?"

"A member of our holy Council of Twelve, Nat, and lord high treasurer of his majesty, King Strang!"

Before Captain Plum could recover from the surprise of this whispered announcement the little old man had freed himself and was patterning awfully through the darkness of the next room. The master of the *Typhoon* followed close behind him. Outside the councillor hesitated for a moment, as if debating which route to take, and then with a prodigious wink at Captain Plum and a throatful of his inimitable chuckles, chose the path down which his startled visitor of a short time before had fled. For 15 minutes this path led between thick black walls of forest verdure. Obadiah Price kept always a few paces ahead of his companion and spoke not a word. At the end of perhaps half a mile the path entered into a large clearing on the farther side of which Nathaniel caught the glimmer of a light. They passed close to this light, which came from the window of a large square house built of logs, and Captain Plum became suddenly conscious that the air was filled with the redolent perfume of lilac. With half a dozen quick strides he overtook the councillor and caught him by the arm.

"I smell lilac!" he exclaimed.

"Certainly, so do I," replied Obadiah Price. "We have very fine lilacs on the island."

"And I smelled lilac back there," continued Nathaniel, still holding to the old man's arm, and pointing a thumb over his shoulder. "I smelled 'em back there, when—"

"Ho, ho, ho!" chuckled the councillor softly. "I don't doubt it, Nat, I don't doubt it. She is very fond of lilacs. She wears the flowers very often."

He pulled himself away and Captain Plum could hear his queer chuckling for some time after. Soon they entered the gloom of the woods again and a little later came out into another clearing and Nathaniel knew that it was St. James that lay at his feet. The lights of a few fishing boats were twinkling in the harbor, but for the most part the town was dark. Here and there a window shone like a spot of phosphorescent yellow in the dismal gloom and the great beacon still burned steadily over the home of the prophet.

"Ah, it is not time," whispered Obadiah. "It is still too early." He drew his companion out of the path which they had followed and sat himself down on a hummock a dozen yards away from it, inviting Nathaniel

by a pull of the sleeve to do the same. There were three of these hummocks, side by side, and Captain Plum chose the one nearest the old man and waited for him to speak. But the councillor did not open his lips. Doubled over until his chin rested almost upon the sharp points of his knees, he gazed steadily at the beacon, and as he looked it shuddered and grew dark, like a firefly that suddenly closes its wings. With a quick spring the councillor straightened himself and turned to the master of the *Typhoon*.

"You have a good nose, Nat," he said, "but your ears are not so good. Sh-h-h-h!" He lifted a hand warningly and nodded sidewise toward the path. Captain Plum listened. He heard low voices and then footsteps—voices that were approaching rapidly, and were those of women, and footsteps that were almost running. The old man caught him by the arm and as the sounds came nearer his grip tightened.

"Don't frighten them, Nat. Get down!"

He crouched until he was only a part of the shadows of the ground and following his example Nathaniel slipped between two of the knolls. A few yards away the sound of the voices ceased and there was a hesitating in the soft tread of the approaching steps. Slowly, and now in awesome silence, two figures came down the path and when they reached a point opposite the hummocks Nathaniel could see that they turned their faces toward them and that for a brief space there was something of terror in the gleam he caught of their eyes. In a moment they had passed. Then he heard them running. "They saw not!" Captain Plum exclaimed.

Obadiah hopped to his feet and rubbed his hands with great glee.

"What a temptation, Nat!" he whispered. "What a temptation to frighten them out of their wits! No, they didn't see us, Nat—they didn't see us. The girls are always frightened when they pass these graves. Some day—"

"Graves!" almost shouted the master of the *Typhoon*. "Graves—and we sitting on 'em!"

"That's all right, Nat—that's all right. They're my graves, so we're welcome to sit on them. I often come here and sit for hours at a time. They like to have me, especially little Jean—the middle one. Perhaps I'll tell you about Jean before you go away."

If Captain Plum had been watching him he would have seen that soft mysterious light again shining in the old councillor's eyes. But now Nathaniel stood erect, his nostrils sniffing the air, catching once more the sweet scent of lilac. He hurried out into the opening, with the old man close behind him, and peered down into the starlit gloom into which the two girls had disappeared. The lovely face that had appeared to him for an instant at Obadiah's cabin began to haunt him. He was sure now that his sudden appearance had not been the

"I Know More Than That, Nat."

only cause of its terror, and he felt that he should have called out to her or followed until he had overtaken her. He could easily have excused his boldness, even if the councillor had been watching him from the cabin door. He was certain that she had passed very near to him again and that the fright which Obadiah had attempted to explain was not because of the graves. He swung about upon his companion, determined to ask for an explanation. The latter seemed to divine his thought.

"Don't let a little scent of lilac disturb you, young man," he said with singular coldness. "It may cause you great unpleasantness." He went ahead and Nathaniel followed him, assured that the old man's words and the way in which he had spoken them no longer left a doubt as to the identity of his night visitor. She was one of the councillor's wives, so he thought, and his own interest in her was beginning to have an irritating effect. In other words Obadiah was becoming jealous.

For some time there was silence between the two. Obadiah Price now walked with extreme slowness and along paths which seemed to bring him no nearer to the town below. Nathaniel could see that he was absorbed in thoughts of his own, and held his peace. Was it possible that he had spoiled his chances with the councillor because of a pretty face and a bunch of lilacs? The thought tickled Captain Plum despite the delicacy of his situation and he broke into an involuntary laugh. The laugh brought Obadiah to a halt as suddenly as though some one had thrust a bayonet against his breast.

(TO BE CONTINUED.)

A bungalow is simply a house that has seven times as much porch as it has enclosed area.

A GREAT INVENTOR

Activities of George Westinghouse Circle the Globe.

Genius Who Holds 15,000 Patents and Whose Air Brake Is in Universal Use on Railroad Trains of the World.

New York.—The recent retirement of George Westinghouse, for nearly twenty-five years head of the Westinghouse Electric and Manufacturing company, recalls the career of this Napoleon of invention.

For many years the name of George Westinghouse has been a name to conjure with. The man has been a modern fulfillment of the Aladdin lamp idea. Everything he touched turned to gold. First it was the famous air brake, that great appliance by which "he saved more lives than Napoleon lost in all his battles." Then it was the system of operating railway signals and switches by compressed air; after which came the incandescent lamp, the gas engine, the steam turbine, electrical motors and machines by the score, and a thousand other inventions that placed Mr. Westinghouse at the time of his retirement in control of the largest aggregation of patented appliances in the world. Fifteen thousand patents are filed away in his strong box. His activities circle the globe; there are Westinghouse plants in Russia, Canada, Great Britain, Germany and France. His parent plants are of course in or near Pittsburgh, more especially Wilmerding.

To condense the career of this man, who ranks with Watt, Stephenson, Morse and Whitney, into a paragraph or two, the biographers tell us that he was born at Central Bridge, Schoharie county, New York, on October 6, 1846. A decade later his parents moved to Schenectady, where his father became in time connected with the prosperity class as owner of certain agricultural works. The tinkering son divided his attention between the school and the

George Westinghouse.

shop; when he wasn't masticating his books, he was monkeying with the buzz-saw. At fifteen he had invented and made a rotary engine. One day the notion struck him that he'd like to help Uncle Sam out in the navy. So he took a shot at the examinations and scored a hit, landing a job as assistant engineer. Before he reported for duty the Civil war had broken out. He enlisted in the Twelfth New York National Guard, re-enlisted later in the cavalry, and finally turned up on the high seas as an engineer on the gunboats *Muscota* and the *Stars and Stripes*.

After Gettysburg was fought and won, his thirst for more education landed him in Union college. Two years there were enough for him. The magic of machinery called him away from the academic life, and he found happiness again by taking up his old work in his father's factory. It was while working there that he invented the air brake. Railroad managers who first jeered at his idea of "stopping a train with wind" had to eat humble pie. In a short time the invention was in universal use and had revolutionized railroading, as locomotives could be constructed that would travel at a high rate of speed, so long as they had that little lever in the cab, which by a single turn of the engineer's wrists would bring the train to a standstill in half its length. In the United States all railroads are compelled by law to use the device, and this was adopted by congress and everywhere around the great curve of the world the "whistle of Westinghouse" air brake is heard.

His first prominence in electricity came with his purchase from Gaulard & Gibbs of alternating electric current patents. This was in 1885, and he met great opposition from public sentiment in trying to perfect and introduce this system for lighting and power making. At the time of the Chicago world's fair in 1893 he received the contract for lighting by making a bid of \$1,000,000 under others. His shop in Pittsburgh soon became the place where electrical experts of the world gathered. Tesla went there and received Westinghouse's financial and practical help in developing the induction motor.

Westinghouse built the first ten great dynamos for Niagara. He also constructed the dynamos for the elevated and subway lines in New York.

STEEPLEJACK MILLER DEAD

Famous "Human Fly," Who Finally Met His Fate by a Fall at Los Angeles.

Los Angeles, Cal.—Steeplejack Miller, famous in every large city in the United States, and the man who has probably risked his neck more than any other man in the world, is dead. He fell to his death from the seventh story of the Hamburger building in Los Angeles. Miller was known in every large city as the "human fly." It was his boast that he could scale the side of any building in the world where he could find a handhold. Recently he climbed to the ninth floor of the Flatiron building in New York,

Steeplejack Miller.

using nothing to aid him in the climb but the projecting stones and crevices on the side. He would have gone on to the roof had he not been stopped by the police.

He climbed buildings in New York, Chicago, Pittsburg, New Orleans, Philadelphia, St. Louis and in fact every large city in the country. That was the way he made his living. While he scaled the side of the building and performed dizzy stunts from the edge of the roof, a partner would pass the hat among the crowd below, and in this manner quite a respectable sum could be picked up.

None know the man's true name. He left home when he was fourteen years of age and took to climbing as a profession, and followed it all his life. Up to the time of his death he had never had a fall, and it was his boast that he would die in bed, despite his dangerous calling.

On his last trip up the side of the Hamburger building, when he reached the seventh floor he mistook a shadow for a handhold and stepped confidently forward to what appeared to be a fine hold. There was the scraping sound of flesh rubbing against the stone side of the building; a swift rush forward by the crowd, and then a body swung outward and dropped, turning over and over in the air. At the third floor he struck a ledge, bounding from there to the street, where he lay, with every bone in his body broken. He died a few hours later.

INDIANS WITH FLAT HEADS

Northwestern Tribe Among Whom Mechanical Compression of the Head Is Still Practised.

Seattle, Wash.—The Chinook Indians of the Pacific coast region are now about the only tribe of American aborigines who flatten their heads, whence the term applied to them—Flatheads. This compression of the head, brought about by mechanical

Two Flathead Indians.

means, is applied in infancy and the process is continued for several months. In time most of the effects of the flattening process wear away and the head gradually tends to assume normal shape.

Originally head-flattening was practised among various tribes, including the Chickasaws, Choctaws, Caribs, Toltecs and the ancient Peruvians, and the custom was ascribed, but very erroneously, to the Sella Indians, who never indulged in the practice at all. The Chinooks live along the Strait of Fuca and are chiefly a fishing and maritime people. They are commonly diminutive, with ill-shaped limbs and unprepossessing features and their complexion is darker than that of the other redskins of the northwest.

Stork May Bring Pension. Pensacola, Fla.—Mr. and Mrs. T. Barber of this city received from Governor Gilchrist, the other day, a handsome spoon bearing the seal of the state of Florida. Married nineteen years ago, the wife now only thirty-seven years old, Mr. and Mrs. Barber are the parents of 13 children. Six of the children are twins. Governor Gilchrist suggested that the legislature pass an act allowing the parents a pension.

Your Liver is Clogged up

That's Why You're Tired—Out of Sorts—Have No Appetite.

CARTER'S LITTLE LIVER PILLS will put you right in a few days. They do their duty. Cures Constipation, Biliousness, Indigestion, and Sick Headache. SMALL PILL, SMALL DOSE, SMALL PRICE. Genuine must bear Signature.

A Skin of Beauty Is a Joy Forever.

DR. T. FELIX GOURAUD'S Oriental Cream and Magical Beautifier.

Removes Tan, Pimples, Freckles, Moth Patches, Rash and Skin Diseases, and every blemish on beauty, and defies detection. It has stood the test of 60 yrs. and is so harmless we taste it to be sure it is properly made. Absolutely no counterfeits of similar name. Dr. L. A. Barry said to a lady of the haut-couture (a patient): "As you ladies will use them."

"Gouraud's Cream" as the least harmful of all the skin preparations. For sale by all druggists and Fancy Goods Dealers in the U.S., Canada and Europe. Ford T. Hopkins, Prop., 37 Great Jones St., New York.

DYSPEPSIA

"Having taken your wonderful 'Cascarets' for three months and being entirely cured of stomach catarrh and dyspepsia, I think a word of praise is due to 'Cascarets' for their wonderful composition. I have taken numerous other so-called remedies but without avail, and I find that Cascarets relieve more in a day than all the others I have taken would in a year."

SORE OR SWARTY FEET? Use the world's best foot remedy, Gerlach's Preservative Cream. 25 cents. Agents wanted. DIT. OTTU, Quakertown, Penn.

Selfish Youth. "Youth is apt to be selfish," said Mrs. Mary E. Wilkins-Freeman, the distinguished novelist, at a Matuchen picnic.

"Woman in her youth," she went on, "is especially apt to be selfish. I'll never forget the story of the young man from Boston who stood in the center of Boston common in a down-pour of torrential rain.

"As he stood there, soaked to the skin, a little boy in a mackintosh accosted him.

"Excuse me, sir," said the boy, 'but are you the gentleman who is waiting for Miss Endicott?"

"Yes," the young man answered. "Well," said the boy, 'she asked me to tell you she'd be here just as soon as it clears up.'"

A Specialist.

"I don't see you on the messenger force any more, Jimmy," said the lad with the envelope in his hand.

"No; I've got a good job with a dog-fancier," replied Jimmy, as he puffed a cigarette.

"Did a dog-fancier? What do you do—feed the dogs?"

"Now! When a lady comes in and buys a pet dog I teach 'er 'ow to whistle."

Domestic Amenities.

"Hubby, I gave you light pants to a poor tramp."

"And what am I going to wear this summer? Kilts?"

The Philosopher of Folly.

"Kind words never die," says the Philosopher of Folly, "and that is why they are so seldom carried out."

Cut Out Breakfast Cooking

Easy to start the day cool and comfortable if

Post Toasties

are in the pantry ready to serve right from the package. No cooking required; just add some cream and a little sugar.

Especially pleasing these summer mornings with berries or fresh fruit.

One can feel cool in hot weather on proper food.

REBUKE DISTURBERS

**TAFT IN LETTER TO GRISCOM
HITS VICE-PRESIDENT
SHERMAN.**

WOULD AVOID CONTROVERSIES

**President Explains His Position in
Regard to Fight Over New York
Chairmanship—Was Not Op-
posed to Roosevelt for Place.**

New York, Aug. 23.—President Taft and former President Roosevelt are again fellow workers in the same political field. The threat that they might pull apart has been foretold by a full explanation on one side and an unreserved acceptance on the other. The president makes it plain in a letter given out here Monday by Lloyd C. Griscom, president of the New York Republican county committee, how the misunderstanding arose. He explains that he never took any part in a committee cabal to defeat Colonel Roosevelt for temporary chairman of the coming Republican state convention.

Mr. Taft's letter, which was made public by Mr. Griscom, follows:

Replies to Griscom's Telegram.

"Beverly, Mass., Aug. 20, 1910.

"My Dear Mr. Griscom: As you know from my telephone conversations with my office, I have steadily refused to admit the propriety or necessity of the president's replying to newspaper statements which are not based on any act or authorized word of his and have no sponsor. I am entirely willing, however, to reply categorically to your telegram of August 19, which has just arrived and which is as follows:

"I am informed and believe that several members of the New York state committee who voted for Vice-President Sherman over ex-President Roosevelt as nominee for state chairman of the state convention were influenced by statements that the vice-president's name was presented to defeat Colonel Roosevelt in accordance with your wish. A member of the state committee declared to me before the meeting that Mr. Sherman's candidacy had been arranged with you by telephone the previous day. Efforts have been made to create an impression that you favor a particular candidate for election as state chairman. I want you to know that the injection of the name of a high member of your administration into a factional conflict has produced a most complicated situation, and the absence of any authoritative information as to your attitude is seriously misleading many Republicans and impairing a movement for progressive party leadership and clean government in this state. I know you desire us to have a fair field and hope that this may be made clear to the public."

Favored Roosevelt as Chairman.
"The suggestion that I have ever expressed a wish to defeat Mr. Roosevelt for the temporary chairmanship of the convention or have even taken the slightest step to do so is wholly untrue. I never heard Mr. Sherman's name suggested as temporary chairman of the state convention until I saw in the newspapers of August 16 that he had been selected at the meeting of the committee. When you called at my house Saturday evening, August 13, you told me that Mr. Roosevelt intended to go to the convention as a delegate and you suggested incidentally his being made temporary chairman, a suggestion in which I acquiesced. It did not occur to me that anyone would oppose it. This was the first time the subject of the temporary chairmanship was mentioned to me by anyone. You did not ask me to take any action whatever with respect to it. After a full discussion of the New York state situation I drafted in your presence the following telegram and sent it to Mr. Sherman:

Would Avoid All Controversy.
"Honorable James S. Sherman, Vice-President, Utica, N. Y.

"Please say to Ward and Woodruff that I have had a long conference with Griscom. He confirms my judgment already expressed to you that the whole situation in New York may be saved without humiliation to anyone and with victory for the party by a full conference with Mr. Roosevelt and reasonable concessions with reference to platforms and candidates.

"The thing of all others that ought to be avoided is a controversy in the convention. I am told by Mr. Griscom that such a conference with Mr. Roosevelt might conveniently be had and would be welcomed by him before the state committee meets on Tuesday. Hope you will be able to report satisfactory solution when you come on Wednesday.—William H. Taft."

Protests Against Root's Name.
"On the afternoon of Monday, August 15, Mr. Sherman telephoned me from New York and for the first time

apprised me of the fact that there was a proposal to oppose Mr. Roosevelt for the temporary chairmanship and that with Mr. Root's name. No other name than Mr. Root's was mentioned. I protested against the idea of a contest on such a matter, peremptorily declined to be drawn into a fight against Mr. Roosevelt, and again renewed my urgent advice that there be prompt and full personal conference with Mr. Roosevelt before the committee meeting with a view to securing harmony and victory for the party.

Deplores Break in New York.
"Mr. Sherman called upon me here on the 17th instant to meet an engagement of a week's standing made with him and Mr. Loudenslager to discuss the congressional campaign textbook. Mr. Loudenslager was prevented from coming by an illness.

During the conference with Mr. Sherman I told him I deplored the result of the meeting of the New York state committee because, unless the break was repaired it meant division between New York Republicans and probable defeat. Upon leaving me Mr. Sherman agreed to go into a conference with Mr. Roosevelt, provided he were invited to do so, with a view of adjusting the situation if possible even at that late date. Mr. Nicholas Longworth was present and said he would send a telegram to bring about a conference. What the result has been I do not know.

Favored No Particular Candidate.

"Finally, in your telegram received this morning you state that efforts have been made to create the impression that I favor a particular candidate for election as state chairman. This is absolutely untrue. I have expressed no opinion on the subject since an effort was made last winter by the New York congressional delegation to secure Mr. Woodruff's retirement, which failed.

"I am very sorry indeed to observe columns of unfounded assertions in the newspapers concerning my attitude in respect to the New York situation. You know, however, as well as other New York leaders that whenever my advice or assistance in reaching a satisfactory adjustment of the difficulties arising has been sought, I have urged the necessity for the fullest conference with Mr. Roosevelt by the members of the organization and with due deference to honest difference of opinion, have expressed the view which I will entertain that the solution of the direct primary issue can be found in provisions similar to those of the Cobb bill as amended in accord with the memorial signed by Mr. Seth Low, Mr. Joseph Choate and other prominent Republicans of New York city.

"Sincerely yours,

"WILLIAM H. TAFT."

Griscom Issues Statement.
In commenting on President Taft's letter and the situation which it disclosed, Mr. Griscom gave out the following statement:

"The methods used to accomplish the defeat of Mr. Roosevelt when his name was before the state committee are now clear to the public and may be judged by the public.

"Those personally acquainted with Mr. Taft's views were, of course, never in doubt that his advice had been ignored and that his attitude was misrepresented in order that those who misrepresented him might appear as the defenders of his administration.

"I have not the slightest doubt that the action of the state committee will be reversed and that Mr. Roosevelt, if his engagements will permit him to accept, will act as temporary chairman of the convention, making the keynote speech. As president of the New York Republican county committee, I shall actively co-operate with Republicans throughout the state who believe it in the interests of the party that this result be brought about.

"Mr. Taft's reply to my telegram discloses that the reports industriously circulated, of a supposed conflict between the president and the ex-president on New York state matters are baseless.

"The way is now clear for the Republican party in this state to take steps which will warrant and secure success at the polls in November. It is evident that some of the so-called 'old guard' are not seeking Republican success at the coming election; they wish to perpetuate their control of the Republican organization at any cost to the party.

"The defeat which their plans invited they very willingly would have unloaded upon the shoulders of President Taft by making it appear that he failed to endorse the policies of Governor Hughes and Mr. Roosevelt in this state.

"The alliance of some of the 'old guard' leaders with Tammany hall in the last two legislatures was a disgrace and should be repudiated by the party.

"Substantially, all the Republican primaries are still to be held throughout the state. There can be no misunderstanding of the position taken by President Taft, ex-President Roosevelt and Governor Hughes for progressive leadership in the party and clean government."

Ohio Pastor Is Arrested.

Zanesville, O.—Rev. A. A. Heubrich, pastor of the Miltonsburg (O.) Lutheran Evangelical church, was arrested Sunday, charged with the theft of 17 watches and other jewelry valued at \$300 from students of the Eden Theological seminary at Clayton, Mo., where he was on probation. The pastor said he stole because he needed money and that on account of suspense he was glad he had been caught. He said he would learn some trade in prison so as to be useful

I. C. STORM BREAKS

**THREE FORMER OFFICIALS OF
ROAD ARE TAKEN INTO
CUSTODY.**

MORE ARRESTS WILL FOLLOW

**Charges of Conspiracy to Defraud and
of Confidence Game Placed Against
Harriman, Ewing and Taylor in
Car Repair Frauds.**

Chicago.—The Illinois Central railway graft scandal broke Friday with tempestuous fury when three former high officials of that road were arrested on charges of conspiracy to cheat and defraud the road by false pretenses. More arrests are to follow and the names of others said to be implicated will probably be revealed at the trial of the men already under arrest.

These arrested are:
Frank B. Harriman, former general manager of the Illinois Central system.

Charles L. Ewing, former general superintendent of the Illinois Central lines north of the Ohio river.

John M. Taylor, former storekeeper for the Illinois Central.

The men were taken before Municipal Judge Bruggemeyer, who released them on \$20,000 bonds each.

The history of the car repair frauds, the alleged fraudulent transactions between the officials and railroad employees, and the like also will be told on the witness stand.

Harriman, as general manager of the entire system, was the next man to Ira G. Rawn, the vice-president who resigned to become president of the Monon road, and who was killed with his own revolver in his Winnetka home. Harriman resigned his position in March, the public announcement being made March 15.

C. L. Ewing resigned as general superintendent of the northern lines at Chicago soon after the first exposures were made in connection with the discovery of wholesale frauds.

Taylor resigned as general storekeeper May 1, at the time when President Harahan's office was being flooded with resignations from officers of high and low rank.

PEST IN ITALY SPREADING

**Twenty Thousand People Flea From
Cholera-Stricken Town—Disease
of Virulent Type.**

Rome.—The cholera epidemic is rapidly spreading in southern Italy, but rumors that it had also reached this city are without foundation. Not a single case has been reported here and the health officials are on the qui vive for any appearance of the malady.

According to the reports Friday the disease is of a most virulent type and accompanied by a high death rate. Thirty deaths are reported at Trani. The town is being rapidly depopulated because of the panic among the inhabitants.

The authorities are greatly concerned over the possibility of a still wider spread of the epidemic as a result of this flight of people from the disease centers.

Mite Born to a Farmer.

Duquoin.—A baby girl, weighing one and one-half pounds and less than twelve inches in length, has been born to Mr. and Mrs. Charles Wallace, who live on a farm east of town. The infant is so small that a match will hide one of her fingers, while her head is about the size of a hen's egg.

Matt McGrath Smashes Mark.
Hartford, Conn.—At the Hibernian Athletic club games Saturday, Matt McGrath of the I. A. A. C. New York, broke the world's record for throwing the 56-pound weight for height, with a throw of 16 feet 2 1/4 inches.

General Hayes Is Paralyzed.
Wilmington, Del.—Brig. Gen. Hayes, U. S. N., retired, who was with Lawton when he fell in the Philippines, and who was famous as an Indian fighter, was paralyzed here Saturday. His condition is critical.

PRESENT STATUE TO FRANCE

**BRONZE IMAGE OF GEORGE
WASHINGTON DEDICATED.**

**Virginia's Gift to French Republic Is
Placed in Napoleon Hall at
Versailles.**

Versailles, France.—With appropriate ceremonies the bronze replica of Houdon's celebrated statue of George Washington was dedicated in Napoleon hall of the Chateau de Versailles in the presence of the French minister of war, General Brun; the French ambassador to the United States, M. Jusserand, and his wife, and the American ambassador, Robert Bacon, and Mrs. Bacon; the marquis de Lafayette, the members of the French mission which presented to America the statue of Rochambeau, now at Washington, and former United States Senator Nathan B. Scott of West Virginia.

General Blron, who presided, spoke of the statue as the greatest work of the greatest French sculptor of the eighteenth century. Col. James Mann, chairman of the Virginia commission, delivered the speech of presentation. State Senators Don P. Halsey and F. W. King of Virginia also made addresses on behalf of the state of Virginia.

Ambassador Jusserand, in the absence of the French minister for foreign affairs, M. Pichon, accepted the statue on behalf of the French government. He declared that the friendship of General Washington and of the American people constituted one of the glories of France. It was, therefore, singularly appropriate that this statue, "the third erected on French soil by our ancient allies, should be placed in the palace consecrated to all our glories."

CLEAR SHERMAN OF BLAME

**Congressional Committee Exonerates
Vice-President and Senator Curtis
in Indian Land Probe.**

Sulphur, Okla.—The select committee which was appointed by the house of representatives to investigate Indian land affairs and the so-called McMurray contracts and which also has been investigating the Gore bribery charges issued the following statement:

"The committee has heard and carefully considered all the testimony submitted and is unanimous in the opinion that there is and was no warrant for any person to use the names of Vice-President Sherman and Senator Charles S. Curtis in connection with any improper relations with any Indian contract whatever."

This is the opinion of the committee after hearing scores of witnesses who appeared following the testimony of Senator T. P. Gore that he had been approached by Jake L. Hamon, who, acting in the interest of J. F. McMurray, offered him (Senator Gore) \$25,000 or \$50,000 as a bribe to promote in congress the contracts by which McMurray was to receive a ten per cent. attorney's fee on the sale of \$30,000,000 worth of Indian lands.

STABS CONVICT TO DEATH

**Colored Inmate of Bridewell Plunges
Shears Into Benchmate—Causes
Panic Among Prisoners.**

Chicago.—An oath, an epithet, a scuffle, and ninety prisoners at work in the tailor shop at the bridewell saw William Jones, 26, a colored prisoner, killed William Meyers, also colored, with a pair of shears, which he stabbed him in the breast with. The tragedy happened with a quickness that paralyzed interference.

Pope Honors an American.
Rome.—The pope Saturday appointed John J. McGrane of New York a knight commander of the Order of St. Gregory. This gives him special privileges, such as occupying a distinguished post at papal functions and ceremonies.

Town on Fire Is Saved.

Alanson, Mich.—With the assistance of equipment and firefighters from nearby towns, the village of Alanson was saved from destruction by fire Saturday. The loss is \$80,000.

MADRIZ STEPS OUT

**NICARAGUAN PRESIDENT QUILTS
OFFICE AND FLEES BEFORE
ADVANCING REBELS.**

ESTRADA IS NOW PRESIDENT

**Insurgent Army Is Within Twelve
Miles of Capital City—Many People
Slain in Rioting—American
Legation Strongly Guarded.**

New Orleans, La.—Gen. Juan J. Estrada, the revolutionary leader of Nicaragua, is now president of that republic, having assumed office on Sunday.

The office was transferred to him by Jose Dolorado Estrada, a brother, who on Saturday was made provisional president by Dr. Jose D. Madriz, who abdicated following sweeping victories of the insurgents in the interior and at Granada.

Gen. Luis Mena, with his revolutionary army, is within twelve miles of Managua.

Rioting is in progress at Managua and many have been killed. There is practically no government. Those who could escape fled to Corinto.

Madriz and his family were permitted to leave for Corinto unmolested. They will sail from there for Panama and take the steamer for Europe or the United States.

News of the excesses perpetrated by the revolutionists at Granada, which was sacked and looted, have instilled the people of Managua with dread. Those who cannot get away are barricading themselves in their homes. Women and children were victims of half-starved marauders at Granada.

The United States legation and consulate are under heavy police guard at Managua and the general situation is reported to be very threatening.

Should there be any serious disturbances at Managua, the United States government will assume control there, for which purpose it has sent the Yorktown to Corinto to reinforce the Vicksburg.

MAKES FLIGHT TO LONDON

**Daring American Aviator Travels
From Paris and Captures the
\$25,000 Prize.**

London.—The youthful American aviator, Moissant, accompanied by his mechanic, Albert, Wednesday made a remarkable flight in a biplane from Paris to London across the English channel. It was the first time this feat was ever accomplished, although often tried.

Moissant accomplished his remarkable flight from Paris to Calais and across the channel in company with his mechanic, Albert.

By making his remarkable flight he captures the cup that a London paper offered and the proceeds of the subscription raised in England for Graham White, which the unsuccessful competitor in the London-Manchester flight offered as an award in the Paris-London competition.

Hubert Latham, who started from Issy, a suburb of Paris, to race Moissant to London, met with a series of accidents, the last at Amiens, culminating in the wrecking of his machine as he was preparing to resume the flight. Latham escaped unhurt, but was out of the race.

The last stage of Moissant's flight, the trip across the channel, was accomplished in a strong channel breeze, the wind being so high that experienced aviators looked upon the start as foolhardy. It was such a wind as repeatedly deterred Bleriot, Latham and other aviators from attempting the passage of the straits.

Paris, France.—M. Le Blanc, the aviator, arrived at Issy, in the suburbs of Paris, at 6:45 a. m. Wednesday and is the winner of the cross-country flight which started August 7. The distance of the race was approximately 485 miles. The prize is \$20,000, offered by a Paris newspaper.

Le Blanc, the winner, covered the circuit in 11:55:59. He used a Bleriot monoplane.

CALIFORNIA IS INSURGENT

**Hiram W. Johnson, Exponent of Anti-
Machine Doctrines, Wins Gubernatorial Nomination in Primary.**

San Francisco.—California is insurgent in its Republican politics. Hiram W. Johnson, leading exponent of anti-machine doctrines, has swept the field in Tuesday's primaries, winning his party's nomination for governor by a plurality that will border on 50,000 when all returns are in.

Just how great was the extent of the disaster to the stalwarts cannot be known until outlying districts have been heard from, but every indication points to a clean-cut declaration by the party for insurgency and against the political activities of the Southern Pacific railway.

It is asserted that the progressives have carried to victory two new insurgent nominees for congressmen, William Kent in the Second district and W. D. Stephens in the Seventh.

Plot to Destroy Steamship.

New York.—The discovery a few hours before the time set for the sailing of the Russian liner Lituanian Saturday of a can of giant powder in the coal that was being loaded into the ship's bunkers is believed to have forestalled a scheme for the destruction of the vessel at sea. The Lituanian carries more than 100 passengers and a large cargo. The can containing one and one-half pounds of gunpowder had been almost scooped up by the great shovel when a workman saw it.

REPORT 105 DEAD IN FIRE

**MANY HEROIC FIGHTERS CUT
OFF BY THE FLAMES.**

**Forest Flames in Montana and Wash-
ington Are Spreading—Wallace
Is Nearly Wiped Out.**

Spokane, Wash.—One hundred fire fighters are reported dead in the flooded canyon near Wallace, Idaho, and five citizens were burned to death in their homes as a result of forest fires which for sixty days have terrified the Coeur d'Alene country and which spread to the town of Wallace, the metropolis of the mining district.

More than a third of Wallace is burned. The Pacific, Michigan and Coeur d'Alene hotels, two O. R. & N. depots, a big hardware warehouse and 150 to 200 residences are destroyed. The town is almost dark by day and the heavens and surrounding country a seething mass by night.

Ashes fill the air and the heat is tremendous. Telegraphic communication is cut off for a time, but the fighters believe they have the fire in the city under control.

Newport, Wash., a town of 2,000, is burning, but the loss of life is as yet unknown. Cries for help are being answered as rapidly as relief parties can be made up. All available soldiers in this part of the country are pressed into service.

WILL NOT SUPPORT CANNON

**Congressman Longworth, After Con-
ference with Taft and Others, Makes
Significant Statement.**

Beverly, Mass.—The fight of the Republican party reorganization against Speaker Cannon was opened by Congressman Nicholas Longworth of Ohio, son-in-law of ex-President Roosevelt.

In a statement which he issued Thursday Mr. Longworth declares that having voted for him in caucus on four different occasions he has supported Cannon for the speakership for the last time and that when the proper time comes, namely the meeting of the Republican caucus at the assembling of the next congress he will oppose Uncle Joe to that position. Mr. Longworth makes it clear that in his view harmony in the Republican ranks and party success depends upon Cannon's elimination.

"I am absolutely convinced," he says, "that Cannon cannot be again elected speaker."

The importance of the Longworth statement lies not only in the fact that the Ohio congressman, a long time friend and supporter of Cannon issued it, but that it was not given to the public until after a series of conferences with President Taft and other leaders that have called here and that the president was acquainted with the content of the statement in advance of its publication, and that Vice-President Sherman likewise was informed Wednesday of the contemplated move and gave it his tacit approval.

Danville, Ill.—"I have no quarrel with Longworth as to who shall be speaker of the next house, and there is no room for disagreement touching this matter between Representative Longworth and myself," said Speaker Cannon Thursday after reading a statement by Representative Longworth.

"If any Republican candidate for congress feels that his position on the Republican ticket would be strengthened by pledging that he will not support me in a Republican caucus I have no objection to his making the pledge."

CRESCUS' TIME IS BEATEN
The Harvester Trots Mile in 2:02 and Makes Four New World's Records.

Buffalo, N. Y.—Sensational racing marked the second day of the Grand Circuit at the Fort Erie track. Several world's records were made in the final heat of the 2:07 trot, when The Harvester, driven by Ed Geers, covered the mile in 2:02, cutting a quarter of a second from the world's record, held by Crescus for nine years. The 2:02 mile also gives The Harvester a world's record for five-year-old trotters; a world's third heat record, stallions, mares or geldings; a world's record for stallions. The track, horsemen, said, was two minutes slow.

Love Affair, Double Shooting.

Morgantown, N. C.—An attendant at the insane hospital here Friday shot and fatally wounded Miss Mary Cuthbertson, an attendant at the same hospital, who refused to marry him. He then fatally shot himself.

Doctor Killed by Patient.

Ottawa, Ont.—Dr. William Empey of Vars was fatally shot Friday by Alfred Blondin, a patient. Before he died Empey said Blondin fired at him deliberately. Blondin declared the shooting was accidental.

Train Wrecker Is Caught.

Chicago.—A plot to wreck the Milwaukee Flyer within forty miles of Chicago and perpetrate a train hold-up a la Jesse James was revealed by the authorities of Waukegan Sunday. A youth was caught in the act of placing ties on the tracks of the Chicago & Northwestern Railroad company Saturday night. He was arrested. Three companions who were with him escaped. Patrick Zamatta, seventeen years old, a section hand, is the one under arrest.

THURSDAY, AUGUST 25, 1910

Dick Longworth has gone back on Uncle Joe. Who cares, Dick's wife smokes cigarettes.

The more the butterine owned Chicago newspapers jump onto Ed Shurtleff the better we think of him around here.

Governor Deneen may have his failings but to charge him of letting go his hold on good money is the vilest slander.

Engelhard is a name that ought to cinch the German vote. One thing Foss may consider handed to him is that the 10th district is not Milwaukee.

If Shurtleff wins the business men of Antioch win and we guess they know it. In the past they have had a fairly good idea on which side of the bread the butter is spread.

When Fred Busse praised the administration of Mayor Gaynor of New York he must have had a private hunch that the Gotham official had a coal business on the side.

If Hime Ferry doesn't get that heirloom, the county clerkship, away from the Hendee family, it won't be because his friends are sleeping on the job in this neighborhood.

That Waukegan bunch has got a shock coming along about the middle of September. Watch it. Elmer Green is the only thing that doesn't look yellow to us over this way.

A real working man for Sheriff is going to be a good thing. Elmer Green is one of that kind and the people out here who have to work are going to plump their votes in for him.

The dairymen further down in the county are preparing to organize a Shurtleff club. Nobody can charge

them with being born yesterday. They are wiser than some of the rest of us.

When Mr. Conn of Woodstock goes to Congress, and it looks as if they couldn't keep him out with a club, the day of the Aurora trust attorneys and millionaire political bosses will have past.

The waterways fanatic is up against it in this dry spell. His grand canal is nothing but a mud trough at this time. We don't blame the Governor for waiting for the spring freshet before getting gay again.

Because the Waukegan newspapers are ignoring the candidates for county offices, that come from Benton, Vernon and other of the smaller towns is all the more reason why we around here should stick together and see that they win.

Watered butter may be a good thing for the creamery but you will notice that the dairyman can't water his milk. It's a poor rule that won't work both ways and this is one of the things that Shurtleff will see to if sent back to the legislature.

A Waukegan newspaper announces that the Lake County Bar has come out for Heydecker. Most people when they wish to get next to the bar have to go inside. This stunt in the Heydecker campaign is certainly worthy of notice but it is the only one we have so far seen that makes us turn a hair.

If George Quentin is elected for County Treasurer at the Republican primaries he will be a man without a price. And we can do without Price. We have had him long enough. He has got his one way and another out of that office long enough and his grip has got to be shaken off. Quentin is a man who specially appeals to voters who are fortunate enough to live outside the confines of the county seat. He will give us new blood and a new regime.

George Edmund Foss is in the lime-light again. A Chicago newspaper has interviewed him. It wishes to know whether he would support your Uncle Joe Cannon for the Speakership in the next session. Think of the effrontery of this yellow sheet, but George Edmund with that sturdy manliness which is the product of an intense devotion to principle was equal to the occasion. He passed the impertinence and with a ring of conviction in his voice that must have startled the poor reporter out of his five senses answered, "I don't know." If

there were nothing else in the career of George Edmund this alone is sufficient to convince us that in the realm of constructive statesmanship he leads the van.

A Recommendation

A club of millionaires has been organized at Lake Forest to oppose the nomination of Shurtleff for the legislature in this district at the Republican primaries. If we need more proof that Edward D. Shurtleff was an honest man, here it is. It is these same millionaires, pork packers, butterine manufacturers and the rest of their ilk that put up the money that has bribed and debauched law-makers of the great state of Illinois. But they could not give their dirty money to Edward D. Shurtleff and they could not make him do their bidding. Hence this millionaire club at Lake Forest.

See That Hump

The lotus eating days of Congressman Foss seem to be over. He has now got to get up and hump if he expects to be returned to Washington this fall. Of course we know it is undignified and also exceedingly bad form for any gentleman to hump but to think that the aristocratic Mr. Foss has got to hump only makes all of us common plebeians grieve the more. The reason for all this is that a man down in Evanston, by the name of George P. Engelhard has come out and is making an active and aggressive canvass for the Republican Congressional nomination for the 10th district. That Mr. Engelhard is known to have a strong personal following, to have a forceful individuality and to have decided opinions in progressive politics, makes this humping business on the part of Mr. Foss all the more necessary.

What would be the result to Antioch and vicinity if George Edmund should fail to go back and once more be chairman of that naval affairs committee, we hate to contemplate.

Life on Panama Canal

has had one frightful drawback-malaria trouble-that has brought suffering and death to thousands. The germs cause chills, fever, and ague, biliousness, jaundice, lassitude, weakness and general debility. But Electric Bitters never fail to destroy them and cure malaria troubles. "Three bottles completely cured me of a very severe attack of malaria," writes Wm. A. Fretwell of Lucama, N. C., "and I've had good health ever since." Cure stomach, liver and kidney troubles, and prevent typhoid. 50c. Guaranteed by J. H. Swan.

AGED VETERAN
FIRES SHOT GUN
AT YOUNG MEN

Henry Sayles, an old soldier residing west of Russell, was the victim of a gang of would-be jokers said to have been from Wadsworth Saturday night at dusk.

The men, who had evidently been drinking; and seeing the old soldier in his yard, began to torment him with shouts and laughter and comments on his personal appearance it is claimed.

It was more than the old man could stand and finally driven to desperation after politely ordering the men to leave Sayles went to his dwelling, took down the old shot gun, and it is claimed to have binged away into the crowd.

One of the men fell wounded but not very badly. Arrests are expected to follow but have not yet taken place. The sympathy of the people of Russell appears to be with the aged veteran who tried to defend his home after its peace had been threatened.

THROW STONES
IN THROUGH
CAR WINDOWS

Stone throwing miscreants are again busy along the Northwestern road and this time the offenses are frequent in the neighborhood of Glencoe.

It is up to the Northwestern road to do something pretty soon as people are becoming angry.

Last Saturday on the 4:40 out of Chicago for Waukegan a local man had a narrow escape when with unerring accuracy a brick came through the open car window and struck him on the shoulder. It pained but did not injure him badly. His wife and infant child had removed from the window just a scant minute before the brick came through. Either one might have been injured badly had they remained.

The same man told his family of the occurrence and on a canvass being made it was found that two other members of the family had had like incidents happen to them in the same vicinity one case being noteworthy in that the pane of glass was shattered.

Struck A Rich Mine.

S. W. Bends, of Coal City, Ala., says he struck a perfect mine of health in Dr. King's New Life Pills for they cured him of liver and kidney trouble after 12 years of suffering. They are the best pills on earth for constipation, malaria, headache, dyspepsia, debility. 25c. at J. H. Swan's.

Military maneuvers, sham battles, rough riding contest, trick and fancy riding, etc., will make up the program. Adults 25c, children 15c. Proceeds for the benefit of Allendale Seniors.

A telegram was received by Mrs. D. A. Williams the latter part of the past week apprising her of the death of her brother, Edward Rector of Columbus Nebraska. Although no particulars have as yet been received it is supposed that his death was quite sudden as Mrs. Williams had received no word of his illness. Mr. Rector visited relatives here in June and it was just six weeks from the day that he left here that word of his death was received. Mr. Rector will be well remembered by many of our readers as he was a former resident of this place having been born and reared on what is still known as the old Rector farm north of town.

R. A. Lugdr has rented the Ed Little house on Victoria street and will move there as soon as it is vacated by Dr. L. P. Keyes.

Mrs. Ramaker and Mrs. Ward Little of Waukegan, and Mrs. Fred Behns of Gurnee, were in attendance at the funeral of Mrs. Yopp Wednesday.

Mrs. R. M. Genest and Mrs. Fairfield of Kenosha, and Miss Walker and Miss Parsons of Chicago, visited Mrs. W. J. VanDuzer at Maple Lawn farm Tuesday.

Miss Bertha James is expected home Saturday after having spent the past seven weeks with a ladies orchestra, taking in the various chautauquas in Illinois and Iowa.

An auto party from Waukegan were in town Wednesday distributing bills for the annual Labor Day picnic at Electric Park, Waukegan on Monday, September 5, given under the auspices of the Carpenters Union number 448.

In answer to an inquiry made by Village Clerk Hughes of the State Game Commissioners at Springfield it was found that the first day of September is in the closed season. All offenders of the law are promised an arrest and conviction. In section 1 of the Game Laws will be found the following: "And it shall be unlawful to kill, hunt, ensnare, entrap, or attempt to kill, hunt, ensnare, entrap or otherwise destroy any wild goose, duck, brant, coot, (mud hen) rail or other water fowl at any time from the 15th day of April to the 1st day of September, BOTH INCLUSIVE, of each year."

Plan to be there—IT'S THE COUNTY'S GREATEST ANNUAL REUNION

Federal Fish Farming

By HUGH M. SMITH
U.S. DEPUTY COMMISSIONER
OF FISHERIES

IT WAS nearly 40 years ago that the United States government first awoke to the necessity of conserving the aquatic resources of the country, and began those operations in behalf of fishes, fishermen and fish-eaters that have now attained such gigantic proportions.

Several of the states had already established their local fish commissions or boards when in 1871 congress took the initial step toward a national fishery service by the passage of a joint resolution creating the office of commissioner of fish and fisheries.

The early years of the bureau of fisheries were devoted to an investigation of the condition of the fisheries of the Atlantic coast, Great Lakes, and other sections; to studies of the interior and coastal waters and their inhabitants, and to exploration of the off-shore fishing banks. The cultivation of useful fishes was soon taken up throughout the country and quickly attained large proportions. The natural expansion of the work was materially augmented from time to time by acts of congress, and in a comparatively short time the operations came to have a very wide scope.

From year to year, as the importance of the work has become increasingly evident, additional hatcheries have been built, the capacity of existing hatcheries has been enlarged, the scale of the operations has been extended, and new kinds of fishes have been added to the output.

Today there is scarcely a phase of aquiculture, of the fishing industry, or of biological and physical science as connected with the

streams was centered at six hatcheries and subhatcheries in 1909. At one of these the principal species handled is the Atlantic salmon, at four the shad, at three the yellow perch, at two the white perch, and at one the striped bass. In recent years the bureau has operated a shad hatchery on the Delaware river, and has detailed the steamer Fish Hawk for shad hatching in Maine, New Jersey, North Carolina and Florida. The central station, in Washington, is operated largely for experimental and exhibition purposes.

In order to counteract the effects of the very exhausting fisheries of the Great Lakes, the government has maintained hatcheries for many years, and now operates six belonging to the United States and two belonging to the state of Michigan. The fishes to which attention is given are those which enter most largely into the catch of the fishermen, namely, the whitefish, cisco, lake trout, and pike perch, the annual output of which now exceeds one and a

waters, that does not come within the purview of the bureau.

It is conceived to be the better policy to expend a small amount of public money in making fish so abundant that they can be caught without restriction and serve as cheap food for the people at large, rather than to expend a much larger sum in preventing people from catching the few fish that still remain after generations of improvidence.

Public or government fish-culture in America exceeds in extent and importance that of all other countries combined. However, the neglect of some of the states to provide the minimum protection to certain species inhabiting interstate and international waters has not only negated the fish-cultural work of the bureau and of the states themselves, but has practically inhibited it by preventing the possibility of securing an adequate supply of eggs, thus making desirable and necessary the placing of interstate and international waters under the jurisdiction of the general government.

At the end of the first ten years of the bureau's existence, the fishes that were being regularly cultivated were shad, carp, chinook salmon, Atlantic salmon, land-locked salmon, rainbow trout, brook trout and whitefish, in addition to which the propagation of several others had been undertaken experimentally. The list now is six times as long and the annual output is ten times the aggregate for the ten-year period ending in 1881.

The main energies are devoted to the important commercial fishes—shad, whitefish, lake trout, Pacific salmon, white perch, yellow perch, cod, flatfish and the lobster, which are hatched in lots of many millions annually. More widely popular, however, are the distributions of the fishes of the interior waters which are generally classed as game fishes. Although representing only about 10 per cent of the output of the hatcheries, this feature of the work is very important, for it supplies choice kinds of fish for public rivers, lakes and ponds, and for fishing preserves and private ponds and streams in all parts of the United States. The fishes most in demand for these purposes are the land-locked salmon, the different species of trout, the grayling, the basses, the crappies, the sunfishes, and the catfishes, but various others also are handled.

Fish-cultural stations are established by special act of congress, and their location and construction are determined after a careful survey of the available sites in a given state. The usual buildings are the hatchery proper, a residence for the superintendent and his family, and necessary outbuildings. At some stations there may also be power house, foreman's or fish-culturist's dwelling, mess hall and stable.

The only permanent marine hatcheries are in Maine and Massachusetts, where the cod, pollock, flatfish, and lobsters are hatched in immense numbers. Other sea fishes that have in previous years been artificially propagated and may again come under the hand of the fish-culturist are the haddock, the scuppaug, the sheepshead, the sea bass, the mackerel, and the scuteague; some of which were hatched on the steamer Fish Hawk, in Chesapeake bay and Florida.

The fish-cultural work on the eastern coast

half billions. Under arrangement with the Canadian authorities, two egg-collection stations for whitefish, cisco, and lake trout are maintained at points in Ontario.

While surveying a new "bank" on the coast of Alaska, the government steamer Albatross in 20 minutes made the experimental catch of cod and halibut shown in one of our illustrations. As a result of explorations of the Albatross on the Pacific coast, fisheries of great importance have been established there.

The hatcheries on the rivers and lakes of the Pacific coast are devoted almost exclusively to the various salmon. In California, where the bureau established a salmon hatchery as early as 1872, there is one central or main station, at Baird, on the McCloud river, with important collecting stations on two other tributaries of the Sacramento. In Oregon a central hatchery at Oregon City, on the Willamette river, has three subhatcheries on tributaries of the Columbia, in Oregon and Washington, and three subhatcheries on tributaries of the Rogue river, Oregon, in addition to several egg-collecting stations.

The interests of the large salmon fisheries of the Puget Sound region are safeguarded by a hatchery on Baker lake, on the Skagit river. A significant feature of artificial propagation on the Pacific seaboard is that in the Columbia basin the hatching of the acclimatized shad has begun on a small scale, and in the Sacramento basin the cultivation of the acclimatized striped bass has commenced under conditions which indicate that more eggs of this species may be obtained in California than in any of the states to which the fish is native.

The hatcheries in the interior regions constitute the most numerous class, and their output reaches the largest number of people. Their operations are addressed chiefly to the so-called "game" fishes, which, while caught mostly by anglers, nevertheless constitute an important element of the food supply. At these stations large numbers of fish are reared to the fingerling or yearling sizes before being released; for this purpose more or less extensive pond areas are required.

The fish-cultural work of the federal government has now attained a magnitude that cannot readily be comprehended, and is increasing at an exceedingly rapid rate. Especially marked has been the increase in the hatchery product during the past ten years, owing in part to the extension of operations at existing stations, and in part to greater efficiency of methods and appliances. The work during the fiscal year 1909 reached larger proportions than ever before, over three billion fish being produced and planted.

While the bureau does not lay undue stress on mere number, and considers the vitality of the fish and the conditions under which they are planted as of paramount importance, the foregoing figures are certainly very suggestive and as a further statement of the magnitude of the fish-cultural work, it may be of interest

to record that the aggregate output of the hatcheries from 1872 to 1909 was about 28 billion, of which over 13 billion represents the work of the past six years.

In making his original plans for the systematic investigation of the waters of the United States and the biological and physical problems they present, Commissioner Baird insisted that to study only the food-fishes would be of little importance, and that useful conclusions must needs rest upon a broad foundation of investigations purely scientific in character. The life history of species of economic value should be understood from beginning to end, but no less requisite is it to know the histories of the animals and plants upon which they feed or upon which their food is nourished; the history of their enemies and friends and the friends and foes of their enemies and friends; as well as the currents, temperatures, and other physical phenomena of the waters in relation to migration, reproduction and growth.

In pursuance of this policy the bureau has secured the services of many prominent men of science, and much of the progress in the artificial propagation of fishes, in the investigation of fishery problems, and in the extension of knowledge of our aquatic resources has been due men eminent as zoologists who have been associated with the work temporarily. Their services have been the services of specialists for particular problems, and through them the bureau has not only been able to give to the public the practical results of applied science, but has contributed to pure science valuable knowledge of all forms of aquatic life.

The importance to the fishing interests of the work of the bureau in connection with the economic fisheries is widely appreciated and freely acknowledged. The statistical inquiries of the bureau afford the only adequate basis for determining the condition and trend of the fisheries and the results of legislation, protection, and cultivation. Among the numerous special matters in which the bureau has benefited the fisheries the following may be mentioned:

By bringing to the attention of American fishermen new methods and new apparatus, new fisheries have sometimes been established and new fields exploited.

By the introduction of cod gill nets the win-

ter cod fishery of New England was revolutionized. In a single season shortly after the use of such nets began a few Cape Ann (Gloucester) fishermen took by this means over 8,000,000 pounds of large-sized fish, and as much as \$50,000 has sometimes been saved annually in the single item of bait.

By the dissemination of information regarding new fishing grounds important fisheries have been inaugurated. Thus when the abundance of halibut off the coast of Iceland was made known by the bureau, a fishery was begun which yielded from \$70,000 to \$100,000 annually to the New England fishermen.

Owing to the appalling mortality among the crews of the New England fishing vessels, caused in large part by the foundering of vessels at sea, the bureau many years ago undertook the introduction into the offshore fisheries of a type of craft which would combine large carrying capacity and great speed with enhanced safety. By correspondence, discussion in the daily press, personal interviews, exhibition of models and finally by the actual construction of a full-sized schooner (the Grampus), with the requisite qualities, the bureau was enabled to inaugurate a momentous change in the architecture of fishing vessels; so that for a long time the New England schooners have been constructed on the new lines, with a consequent minimizing of disasters and a decided increase in efficiency.

In other fisheries and regions the bureau has likewise advocated improved types of vessels and boats especially adapted to local conditions, and has published plans and specifications embodying the results of studies of the fishing flotilla of the world.

The results of the bureau's efforts in this line in saving life and property, in increasing the usefulness of the vessels, and in improving the quality of the catch as landed, cannot be estimated, but the beneficial effects may be partly appreciated when it is stated that during the ten years ending in 1883, when the old types of vessels were in use, there were lost by foundering from the port of Gloucester alone, 82 vessels, valued at more than \$400,000, with their crews of 895 men, while during the ten years ending in 1907, the losses from this cause aggregated only a fourth as many vessels and men.

Federal Fish Farming

By HUGH M. SMITH
U.S. DEPUTY COMMISSIONER
OF FISHERIES

IT WAS nearly 40 years ago that the United States government first awoke to the necessity of conserving the aquatic resources of the country, and began those operations in behalf of fishes, fishermen and fish-eaters that have now attained such gigantic proportions.

Several of the states had already established their local fish commissions or boards when in 1871 congress took the initial step toward a national fishery service by the passage of a joint resolution creating the office of commissioner of fish and fisheries.

The early years of the bureau of fisheries were devoted to an investigation of the condition of the fisheries of the Atlantic coast, Great Lakes, and other sections; to studies of the interior and coastal waters and their inhabitants, and to exploration of the off-shore fishing banks. The cultivation of useful fishes was soon taken up throughout the country and quickly attained large proportions. The natural expansion of the work was materially augmented from time to time by acts of congress, and in a comparatively short time the operations came to have a very wide scope.

From year to year, as the importance of the work has become increasingly evident, additional hatcheries have been built, the capacity of existing hatcheries has been enlarged, the scale of the operations has been extended, and new kinds of fishes have been added to the output.

Today there is scarcely a phase of aquiculture, of the fishing industry, or of biological and physical science as connected with the

streams was centered at six hatcheries and subhatcheries in 1909. At one of these the principal species handled is the Atlantic salmon, at four the shad, at three the yellow perch, at two the white perch, and at one the striped bass. In recent years the bureau has operated a shad hatchery on the Delaware river, and has detailed the steamer Fish Hawk for shad hatching in Maine, New Jersey, North Carolina and Florida. The central station, in Washington, is operated largely for experimental and exhibition purposes.

In order to counteract the effects of the very exhausting fisheries of the Great Lakes, the government has maintained hatcheries for many years, and now operates six belonging to the United States and two belonging to the state of Michigan. The fishes to which attention is given are those which enter most largely into the catch of the fishermen, namely, the whitefish, cisco, lake trout, and pike perch, the annual output of which now exceeds one and a

IN TOUCH WITH FRIENDS and RELATIVES

A GRANDMOTHER may not be as spry as she used to be, but she is in close touch with her world for all that.

The telephone enables her to make as many calls as she pleases, and in all sorts of weather.

Formal gatherings have their place, but it is the many little intimate visits over the telephone that keep people young and interested.

Grandmother's telephone visits do not stop with her own town. The Long Distance Service of the Bell Telephone takes her to other towns, and allows relatives and friends to chat with her although hundreds of miles away.

Chicago Telephone Company

Every Bell Telephone is the Center of the System.

The House Wired for Electricity

Secures to those living in it a

LIGHT

Superior to all other artificial illuminants at a cost for operation no greater than others and

POWER

To run a great variety of appliances that do the work usually done by human hands

WIRING A HOUSE

Means modernizing it, and adding to its value. The operation is neither expensive nor inconvenient to the occupants.

LET US EXPLAIN OUR PLAN OF DOING THE WORK AT COST, FIXTURES INCLUDED, NO INTEREST AND 24 MONTHS TO PAY

North Shore Electric Co.

The average slaughter-house is *hard* to keep clean. A *Marquette Concrete* slaughter-house almost *cleans* itself—*required* sanitary conditions are *easy* to observe. *Time saved* in cleaning up and the *added value* of the fresh killed meats will pay the first cost of a *Marquette Cement* slaughter-house in a comparatively short time. Once built, the *Marquette Concrete* slaughter-house is *up for all time*. Materials are *cheap* and the structure is so easy to build that you can do it *yourself*. We'll gladly send you details for building a slaughter-house with
